

SAM Web services - Feature #7611

Method to count total filesize of dataset

01/09/2015 02:17 PM - Christopher Backhouse

Status:	Rejected	Start date:	01/09/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%

Target version:		Spent time:	0.00 hour
Description			
Would it be possible to add a feature like samweb count-definition-size or some other name, which sums up the size of all the matching files (in GB or other suitable units)?			
Or is there some easy way to do this already?

You can use the --summary option with list-definition-files (although it only returns bytes; you'll have to convert to something more readable yourself).
